

TIN CLAD COPPER

9510

Tin clad copper shielding tape with non-conductive adhesive

9515

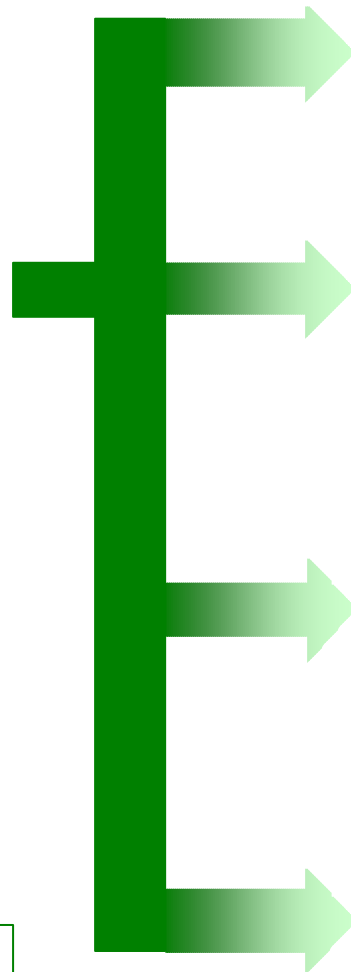

Tin clad copper shielding tape with electrically conductive adhesive

9516

Double sided tin clad copper on both sides with electrically conductive adhesive

9520

Embossed version of 9510

RD-742 0.035mm

Greater density of conductive particles – maximum electrical conductivity per contact area

NEW

RD-445 0.035mm

Thicker layer of adhesive giving increased adhesive strength

RD-715-6 0.035mm

Low out-gassing version
Suited to aerospace and hard disk applications

RD-648 0.035mm

Higher temperature resistant acrylic - Designed to leave no residue when removed
